

Appeal

To the American Nation, to the relatives of soldiers injured and dead in Afghanistan and Iraq

Dear Fathers, Mothers, Brothers and Sisters!
Honorable Senior Citizens!

A few days ago the USA State Department in its another report promised "to support the conduct of free and fair elections in Russia". It said, that "the USA did provide financial and technologic aid to the NGOs and groups of civil society that operate in Russia and take great part in its social life". The representatives of the State Department cannot but realize the fact that such a "support" is a rude violation of the international law. All the more, it is virtually interference with the domestic affairs of the sovereign state.

The USA State Department attempts to turn Russia into the next flashpoint on the world map, whereas the war in Afghanistan is not brought up to an end, the Iraq conflict is in the height, and the war in Iran can break out any day - it is the matter of just few calendar pages. Ben Laden has not been caught in Afghanistan. The nuclear weapon has not been found in Iraq. Instead, thousands of American soldiers have died. The number of state flags for zinc coffins and time will only show what will not be found in Iran.

There is no doubt, that the Russia society will totally reject the State Department "support" of the Russia elections as well as the personal aid of those who do their utmost to destabilize situation. It means that the confrontation is irreversible. It also means a return to the times of the Cold war. At its best.

Today we, the Russian citizens, appeal to the American people. We appeal to people in particular,

because the appeal to the State Department is useless and meaningless. Only the great American people can prevent the death of their children and stop the aggravating image of the USA throughout the world. Tomorrow there will be war in Iran, the day after tomorrow Russia will be governed externally. And it is eventually American people that will pay the costs for that and die.

Take to the streets!

Cry for the resignation of the President and dismissal of the State Secretary!

Stop fanatics the State Department!
